PHLEBOTOMY CASES

VIDEO NARRATION

The phlebotomy cases offered by Innovative Medical Technologies offer an attractive and space saving solution to all of your phlebotomy needs.

You will customize the cases yourself by removing the foam squares to accommodate the supplies that you wish to store and carry to your collection sites.

Two sizes are available: the large case measures 14 by 8 by 3 inches while the small case is 10 by 6 by 3 inches.

And when used in conjunction with the Innovac 2, they offer up to an 80 percent noise reduction for your patient's well-being and relief.
